Testimonials for Everything Epee:

I've been able to incorporate much into my weekly classes. The STCs (session training companions) are GOLD!

Some highlights/things I've found very useful:

- How to combine blade and actions for both student and coach;
- Mechanical drills for compounds Attacks and compound Counter-attacks (I now use variations every class),
- Tips for regulating distance and doing better cues, and
- Explanations to help students learn both actions on the blade and blade takes/transports have been very helpful.

Prévôt Patrick B.

I have to tell you this class has greatly improved my teaching, and also fundamentally changed it for the better.
Really enjoying it!
Coach Jacob N.

I cannot think of anyone (coach) who wouldn't find some aspect of what you're doing helpful, insightful, or for them to think about as it could apply to their club or team.
Especially for all new coaches the STCs are so valuable.
Thank you Rob,
Coach Jim E.

This class has been comprehensive, working from the fundamental actions to more advanced ones, and at each stage Maître Handelman has demonstrated how to teach any level of fencer …. I have a much firmer grasp of the weapon and how to teach it.

The "more:" The "more" in this class is not just more, but *considerably* more, and that is on top of the excellent overview of epee fencing
Prévôt Anthony A

I think this was a great use of technology. Especially great for sharing information without the difficulties of having to travel. I think that Rob presented the material clearly and did a great job of showing actions from different angles which was helpful for video.
